

## NEIGHBOURHOOD WATCH.

**Help yourself and vulnerable neighbours to be safe.**

With ever decreasing police numbers and availability plus the increased workload that they find themselves under, the need for the general public to be ever more watchful on personal security and cyber fraud has become very much a more important part of our everyday lives.

Whilst as a Watch we try to engage with the public through meetings which are often poorly attended and news bulletins there are simple ways to obtain advice and to learn what is happening in your area through the use of modern day technology and the internet.

Bournemouth for example has its own Facebook page which carries a wealth of information at **BOURNEMOUTH VIRTUAL NEIGHBOURHOOD WATCH.**

We suggest visiting the following for information both locally and county wide for guidance, support and local contacts.
